Smyrna, Del. – Town officials are celebrating yet another important milestone in their efforts to provide quality utility services to the residents and business located in the northern part of Smyrna near Duck Creek.

On Tuesday, August 20, 2013, United States Senator Thomas R. Carper will join Smyrna Town Mayor Joanne Masten in a ceremony officially opening the valve which allows drinkable water to flow across Duck Creek. The two will be joined by representatives from the United States Department of Agriculture (USDA), members of the community, and a host of senior town officials.

With funding from the USDA and the Delaware Department of Natural Resources and Environmental Control (DNREC), Smyrna has been able to install water and sewer systems as well as electric conduits near Duck Creek into New Castle County. Future projects include the construction of a new sanitary pumping station with force mains, gravity sewer lines, and an elevated water tank.

This utility installation is critical for the redevelopment of northern Smyrna and will greatly enhance the town’s ability to expand and attract new businesses. This ultimately leads to increased employment opportunities and a better quality of life for Smyrna and surrounding residents.
